

Julio Rodríguez vs Hunter Brown – Scouting Report

	Notes
Brown	<p>Facing RHH, Brown uses his 4–Seam/Sinker w/ a Cutter. Also goes to BB w/ the Curve or SL ~10% of the time each. Chase pitch is the SI (40% chase rate). Chase whiff rate is where the danger comes, 4S chase whiff – 40%, Curve – 44%, Cutter – 36%. Pitches w/in the zone less likely to induce a whiff especially on the Curve/SL. SI low hard–hit rate, 4S will be the pitch to hit especially in the zone. Also, jumping on his breaking pitches in the zone produce hard–hits over 50% of the time. Most successful pitch SL w/ lowest xwOBA including inside the zone.</p> <p>Mainly uses the SI/4S 1st pitch but will sometimes drop a FC of Curve. Tends to use the 4S as the put–away & SI to get him back. FCs sprinkled throughout the PA, but used as a set–up pitch for the 4S. Ahead FCs mainly thrown outside the zone, early ahead 4S thrown outside the zone, if he is behind will creep towards the zone more. SI–SI most common 2–pitch sequence, but when he sets up his SI w/ a SI 60% in the zone. When he sets up the SI w/ a 4S the SI is 60% outside the zone & gets a 60% chase rate. As he gets behind, 4S comes down in the zone & FC comes back in the zone. If he throws the FC would be best to place it low & away. Overall has a lot of sucess in the past w/ the FC, cannot throw it in the zone vs Rodriguez, 4S out & Sinkers in will be the best. If he goes down early, keeping the FC outside is best, Rodriguez smashes FCs over the plate. Rare that he uses it but the CH would play well tonight w/ Rodriguez struggling vs it.</p>
Rodriguez	<p>Facing RHP, Rodriguez has high tendency to chase the Sinker & Changeup. Would not be surprised the few CH thrown by Brown one is to Rodriguez. Combination of the SI/SL will induce chases & SL has chase–whiff rate of 60%. Crushes the 4S/SI in–zone out of zone hard–hit rate on the SI is 8%. Does well vs FCs, would hold off on using too much unless cannot get him to bite on pitches outside the zone. Tees off on SI/FC both over .420 xwOBA. .250 ISO vs FCs, if he makes contact out of the zone on FC/SI still can do damage w/ high chase xwOBA. 1st pitch swing rates typically under 50%, will go after a 1st–pitch CH. Will not typically swing at 1st pitch zone SI/SL, but will attack zone 4S/FC 1st pitch.</p> <p>Once he is behind will start to chase the FC/Breaking holds off chasing the 4S until a little later in the count. In Play rates go up as the PA continues. Takes advantage when ahead, w/ a .468 wOBA when ahead compared to .269 wOBA when behind. Goal is get ahead early, Brown has a .468 wOBA when he is behind. When pitcher is ahead will chase the high 4S, likes the high 4S & belt high FC. Hard–Hits vs the 4S come high & in, while the FC has hard–hits middle–middle. Struggles vs the up & out 4S. Overall, do not get fooled & chasing the Sinker in on you. Wait for pitches to start to enter the zone later in the count & take advantage of the FCs that catch the plate.</p>
