

Wheeler:

Facing RHH, Wheeler works mainly with his 4-Seam, Sinker and Sweeper. Sinker and Sweeper are only in zone about 50% of the time, while 4-Seam catches the zone 65% of the time.

Rare to see a Sweeper/Sinker catch the heart of the zone and has a 44% chase rate on his Sinker.

Bregman:

Sees a good deal of 4-Seam and Sinkers, hasn't seen many Sweepers this year

Bregman has a 26% chase rate on the Sinker (highest out of all pitches) would expect Wheeler to work Sinker – Sweeper.

Bregman has a 40% Chase-Whiff rate on Sweepers definitely going to be used in their matchups.

Wheeler:

Has great deal of success with the Sweeper, lowest hard-hit rate. 0% hard-hit rate on Sweepers out of the zone.

4-Seams aren't put into play as often as other pitches, but can be dangerous if hit have a nearly 50% hard-hit rate on 4-Seams in the zone

xwOBA on Sweeper .194 compared to .255 & .250 on 4-Seam/Sinker and a .000 on Sweepers out of the Zone

Bregman:

46% Hard-Hit rate on Sinkers, drops to 17% on Sinkers out of the zone. Chased Sinkers won't likely result in optimal situations for Bregman.

43% Hard-Hit rate on chased 4-Seams, would imagine 4-Seam won't be used too often, Bregman has a .347 xwOBA on 4-Seams overall and a .430 xwOBA on chased 4-Seams

Hasn't had much luck against Sweeper especially against RHP, lowest xwOBA out of all Wheelers arsenal, .144 xwOBA on chased Sweepers

Wheeler:

Most likely to start off with a fastball, later in the count will lean on 4-Seams.

Put away pitch is either the 4-Seam or Sweeper, but the 4-Seam more likely to be in the zone on 2 strike pitches than the sweeper.

Rare to get a chase on the 4-Seam early in the count, but 2 strike sweepers elicit a lot of chases.

Hitters have had the most success putting early in the count Sinkers or late in the count 4-Seams into play

Bregman:

Will swing at a 1st-Pitch 4-Seam but rarely swings at 1st-Pitch Sweepers. Wouldn't be surprised for Wheeler to drop a 1st-Pitch sweeper in the zone for a strike.

2-0 Takes most of the time and 1-1 swings most of the time, could get a chase here on a Sinker.

Even on pitches in the zone, doesn't swing at 2-0 pitches as often compared to other counts.

In 1-1 chases sinkers 36% of the time and in 1-2 chases sinkers nearly 60% of the time.

1-2 Is a very likely chase count, wouldn't expect Wheeler to throw anything other than an outside Sinker or outside Sweeper.

Wheeler:

High first pitch Sinker usage, runs inside, rarely over the heart of the plate and only 50% in zone rate. The first pitch 4-Seam will catch the zone (outside on a RHH) 80% of the time.

PA gets progressively tougher for a RHH as it goes on. xwOBA decreases as pitch of pa increases.

Most popular 2-Pitch sequence is Sinker-4 Seam. Chase rates on the 4-Seam are less than Sinker, especially when Wheeler is down. Opposite for Sinker, when Wheeler is down, he gets a 52% chase rate on Sinker.

4-Seam plays up and out

Sinker plays Middle and In

Sweeper plays Low and away

Wheeler is able to reach all corners of the plate with those 3 pitches. Low and in is reached with his Curveball. Will rarely see a low Sinker. Lower Sinkers result in more hard hits. The weak contact from Sinkers come from when the Sinker runs into the hands on the RHH.

4-Seam – Sweeper gets a 31% Whiff rate on the Sweeper

Bregman:

On 2-Pitch sequences struggle with the Fastball – Breaking Ball mix. Whiffs on nearly 25% of the breaking balls that follows a fastball.

When the pitcher is behind, is where he excels against Fastballs. .494 wOBA against pitcher behind 4-Seams and .479 wOBA against pitcher behind Sinkers. Wheeler getting behind might have luck throwing in a Sweeper or Curveball.

Does well on up and away 4-Seams, middle away is where a lot of the weak contact comes from. Sinkers don't have a strong pattern where he excels/struggles, but posting a 46% hard hit rate on Sinkers.
