

Kyle Schwarber vs Frankie Montas – Scouting Report

	Notes
Montas	Facing LHH, Montas has a main 3 pitch mix leading with the 4S and Splitter then also throwing a Cutter. Note the Split is thrown a 25% of the time but is only in the zone 30% of the time. Montas has success with the Split (32% Chase rate and nearly 50% chase–whiff rate). Montas does mix in a Sinker which is a hittable pitch only inducing a whiff 1% of the time, but hard–hit rates are high on Sinkers. Attacking Schwarber with the Split is a good game plan, as he has not had success against it. Leaving anything over the heart of the plate, Schwarber is going to capitalize. Starts off with a 4S or Cutter then move to the Split early in the count and throwing it away later. Put away pitch is typically the 4S or Split, facing Schwarber would be smart to use Spit. Schwarber does not tend to swing at zone SI early in the count, could sneak a called strike early against him with a fastball. Does not typically chase early in the count, Schwarber forces you to throw strikes early. Early in the count, the 4S lives up in the zone, and Splitters are thrown low and away early. As the count goes on, Splitters will start to creep towards the LHH and in–zone. Tends to get Whiffs on 4S thrown up and over the middle, which is where Schwarber gets a lot of hard–hits. Overall, would expect a fastball early then back to the Splitter. If able to lay off the out of zone Splitters will see more in–zone fastballs as Montas looks for a strike.
Schwarber	Facing RHP, Schwarber does not have much history against the Split in 2024, but he does have an overall 56% whiff rate and 75% chase–whiff rate on Splits. Schwarber should be aware the Split is not thrown in–zone much, and should wait for 4S. Schwarber has a 70% zone hard–hit rate against 4S. Schwarber as a .464 xwOBA against 4S and a .373 zone ISO against 4S. Less overall damage is done against the Cutter and Sinker, especially when you induce a chase. Deeper into the PA, Montas tends to thrown a lot of in–zone 4S, which is exactly where Schwarber can do damage. If able to hold off the early Splitters will see zone fastballs. Typically does not swing at the first pitch the first time seeing, Montas may try to sneak a 4S early, and first pitch 4S has a .739 xwOBA. Schwarber typically does not swing at away Cutters, which is where Montas places his Early Cutters. Hard–Hits on Cutters typically come from over the middle of the plate, and his whiffs on Cutters are when they are thrown up in the zone. Majority of 4S whiffs come from up and away. Overall, has a lot of success against the 4S especially in–zone. Would attack him early with a fastball on the outside edge of the plate to try and get up early then hammer low Splitters to induce a whiff or weak contact. Cutters should be carefully placed anything over the middle of the plate will be taken advantage of.
