

Pete Alonso vs Freddy Peralta – Scouting Report

	Notes
Peralta	Facing RHH, Peralta mainly uses his 4S/SL & will go to the CH/CB less often. SL is in–zone less than 40% of the time, but he does drop CB in the zone ~50% of the time. Chase pitch is mainly the CH, does get a 26% chase on his SL. When he gets a chase on the SL/CB whiffs 62%/90% of the time. 4S/CH have high–hard hit rates especially in the zone, BB not as much w/ O–zone CB in play 0%, SL O–Zone Hard–Hit 6%. W/ CB only used 6%, SL has been most successful w/ .258 xwOBA. 4S has been hit hard w/ .348 xwOBA. Little actual damage has been done when he throws it outside all pitches have a .000 O–ISO expect the SL w/ a .023 ISO. Starts off w/ a 4S or SL & both in–zone over 50% of the time. Mixes the 2K pitch choice w/ 4S/SL & both barely in zone. 2K SL in zone less than 20% of the time. Does not get many 1st–Pitch zone swings, would expect him to drop in a strike 1st pitch. When he gets ahead, his zone rate is 30% vs when he is behind 50%. Throws back–to–back 4S most, & 2nd 4S in–zone 61% of the time. When he comes back w/ a SL after 4S in–zone 30% of the time, & gets a whiff 40% of the time. 4S hangs around the middle of the zone often, when he is behind all pitches are mainly in the zone. CH plays low & in difficult to hit. Gets a lot of weak contact w/ 4S low in the zone, can be good to use if he gets behind. 2K 4S is up & away, SL & CB both low & away. Overall would throw first pitch in–zone starting off w/ a SL he barely swings. Come back w/ a high & outside 4S or stay w/ SL until 2K then high & out 4S. CH will also play a big role vs Alonso.
Alonso	Facing RHP, Alonso is discipline vs the 4S. Only sees RHP CH 4% but chased them 40% of the time. Zone–Whiff vs Chase–Whiff is 12%–50% so if you do get a chase out of him (most likely on the off–speed), better chance at not getting contact. Anything w/in the zone has a high chance of being hit–hard lowest is the SL but still 40% Z–Hard–Hit. .381 xwOBA on 4S & a zone wOBA of .412 is the dangerous thrown to Alonso. .381 Z–ISO, shows a lot of damage being done vs a 4S. wOBA drops vs the SL, especially when he chases it .160 O–wOBA & a .000 O–ISO vs the SL. Wont swing much 1st pitch vs SL (especially in–zone) & 4S is less than 50%. Defineltly a hole here, can exploit it to get ahead early. Does not chase 4S early will start to go after SL later in the count if behind, but if ahead waits for something in the zone. Back–to–Back breaks is where he chases the most & will whiff on the 2nd breaking ball 43% of the time. .478 wOBA vs 4S when pitcher is behind, will punish zone–4S. Swings at the high 4S, which is where his hard–hits come from. SL left in–zone gets hit–hard. SL low & away toughest for Alonso. Off–Speeds are barely in the zone 4S has been very hittable w/in the zone. If you get behind early expect everything outside the zone & work back the count to get zone–4S that will come back later.
