

Juan Soto vs Corbin Burnes – Scouting Report

	Notes
Burnes	Facing LHH, Burnes uses his Cutter and plays the CH/CB off it. Both CH/CB in–zone less than 40% of the time and have chase rate ~30%. Chase–whiff rate on CH/CB over 50%, w/in the zone much lower. FC low whiff and average hard–hit rate ~30%. Outside the zone, CH/CB has a 0% hard–hit chasing his OS is tough to hit. Barely uses the SL, top pitch in xwOBA is CB .215, w/in the zone FC is best at .272 xwOBA. Limits damage w/ FC/CB, CH has .349 zone–xwOBA, good pitch to hit. Outside the zone CB/CH very tough to hit, FC hittable but has low damage probability .073 chase–ISO. Typically starts the PA off w/ a FC or CB and if its FC will be in–zone 60%, CB 1st pitch zone~40%. Put away pitch is a mix between FC/CB/CH, early CH less likely to be in zone rather than later in count. 2–Strike OS almost never in the zone, watch to chase here. Even in ahead counts, the FC is thrown in zone regularly 50% of the time. A lot of his 1st pitch tend to go low and away from LHH. CB has been the most hittable early w/ .531 xwOBA. Most used 2–Pitch sequence is Cutter–Cutter, playing the CH after FC gets a whiff 40% of the time, w/ that 2nd CH out of the zone 70% of the time. If he gets behind, CH becomes extremely hittable w/ a .432 wOBA vs when he is ahead a .158 wOBA. CH plays low and away but as count goes on, brings it back towards the middle of plate still low. Overall Soto rarely swings 1st pitch CH, would be smart to drop one in for a strike then go to the Cutter staying in the zone b/c getting a Soto chase is rare.
Soto	Facing RHP, Soto is disciplined especially vs the CB (4% chase). Whiff rate on the CH is the hgihest at 30%, chase–whiff on CH 46%. Does not hit CB outside the zone hard (0%) chase–hard–hit. FC is handled well w/ overall 63% hard–hit & .536 xwOBA. xwOBA on FC is higher outside the zone at .557. 1st Pitch swing rates low across all pitches, does not touch zone–CH, but will swing at zone FC/CB/SL. Stays away from early CH can be a chance to get ahead early here. Will not chase early especially vs a CB almost makes it ineffective. 2–strikes will chase a FC but stays discipline vs CH. Later in the count, will not get as many whiffs as you might earlier, if you get behind have to throw him strikes he will not chase. 1st pitch swing rates go down the more he faces a pitcher (3rd time seeing 1st pitch swing is only 15%). Does not like to swing at low–CB, main swings come from CB belt high over the middle, will swing at the high FC. High whiff–zone vs FC is low and in, exactly where Burnes gets his whiffs on FC. If you get behind early do not chase his CB, wait for a zone FC when it is thrown a up that is the pitch to hit. Be aware to go up swinging if he throws FC first pitch will most likely be in the zone. Could see him staying away with the FC/CH whole PA and not bringing it in.
